

AKSHAY PATEL

DIRECTOR OF ANALYTICS | DATA, BI & AI LEADER | D2C & E-COMMERCE

Bengaluru, India | +91 8007213130 | akshayp211@gmail.com | linkedin.com/in/akshayp211

IMMEDIATELY AVAILABLE

PROFESSIONAL SUMMARY

Analytics, BI and AI leader with 12+ years building data functions from zero across D2C, e-commerce, marketplace and financial services, including 6+ years leading the function end to end. Built the Analytics and BI function at Uppercase from pre-revenue to Rs. 140 Cr annually, redesigning scattered system extracts into a single, query-optimised warehouse across 20+ sources. Hands-on with SQL, Python, Snowflake, Power BI and Tableau, with a track record of partnering directly with Category, Finance, Product and Executive leadership.

CORE SKILLS

- **Data Modelling and Architecture:** Data warehousing, data lakes, data marts, flat table design, query optimisation, single source of truth, master data management
- **Data Governance:** KPI ownership and standardisation, data quality checks, access controls, reporting standards, review cadence
- **Analytics Domains:** Marketing analytics, product and category analytics, marketplace analytics, operations analytics, consumer and behavioural analytics, credit and risk forecasting
- **Modern Data Stack:** SQL, Python, ETL/ELT, Snowflake, PostgreSQL, Apache Airflow, AWS, GCP, Azure
- **BI and Reporting:** Power BI (DAX, Fabric), Tableau, Qlik Sense, Looker Studio, Adobe Analytics, Google Analytics, executive dashboards, self-service BI
- **AI and Machine Learning:** Predictive and demand forecasting models, churn and propensity models, recommendation systems, Conversational BI (local LLM workflows, Ollama), AI-based KPI alerting
- **Leadership:** Building teams from scratch, hiring and mentoring, executive stakeholder management, cross-functional delivery, roadmap planning

PROFESSIONAL EXPERIENCE

Head of Technology, Analytics & IT | Acefour Accessories Pvt. Ltd. (Uppercase) Jul 2022 - Jul 2026

Bengaluru, India | D2C E-commerce | Reported to CBO, COO, CFO | Led a team of 4

- Built the Analytics and BI function and full data stack from pre-revenue, integrating SAP, OMS, POS, DMS and marketplace systems into a single source of truth across 20+ sources, cutting manual reporting effort by roughly 40 hours a week.
- Redesigned the underlying data model from scattered, system-level extracts into a next-gen data mart with query-optimised flat tables, so category, finance and marketing teams could pull answers themselves instead of raising a ticket.
- Owned pricing strategy, inventory analytics and SKU-level P&L tracking; built a product profitability analyser that drove Rs. 20L+ in quarterly savings through SKU rationalisation and spend optimisation.
- Built marketing mix models across Amazon, Meta and Google spend, improving ROAS by 23% year-on-year and adding roughly Rs. 3.5 Cr in incremental revenue.
- Built demand forecasting, inventory planning and production planning models, improving forecast accuracy by 17% month-on-month, cutting inventory costs by 8% year-on-year and improving product availability by 13%.
- Deployed a Conversational BI platform on local LLMs (Ollama) as a decision copilot for business teams at near-zero recurring cost, and a near-real-time KPI alert engine using anomaly detection across margins, pricing and inventory, cutting issue detection time by 80%.
- Delivered 10+ dashboards covering 40+ KPIs directly to the CBO, COO and CFO, cutting reporting turnaround by around 70%, while supporting annual growth from zero to Rs. 140 Cr within 3 years.

Analytics Lead | 6thStreet.com (The Apparel Group)

Sep 2020 - Jun 2022

Bengaluru, India | Multi-brand Fashion E-commerce | Reported to CFO, CEO | Led a team of 5

- Built the analytics function and a data governance framework on a Snowflake-based warehouse, defining KPI ownership and self-service standards across Marketing, CRM, Product, Finance and Operations.

- Built customer segmentation, cohort analysis and CLV analytics that lifted campaign effectiveness by 12%, and led fraud-detection and financial-partnership analytics that contributed to a separate 12% growth in net orders.
- Redesigned product listing ranking across web and app using category-level A/B testing, improving click-through rate by 4% and conversion by 143 basis points.

Manager, Analytics - Fashion & Marketplace | Flipkart Internet Pvt. Ltd. (Walmart) Jan 2016 - Aug 2019

Bengaluru, India | Rs. 500-650 Cr Revenue | Led a team of 6

- Joined as a Business Analyst on Women's Apparel and grew into leading analytics for the entire Fashion business unit (Rs. 600 Cr business) within two years.
- Built product ranking and recommendation models, and led Project Queen, a gender-prediction model built from behavioural and product-affinity data, which grew traffic and revenue share from a targeted customer persona.
- Built a seller churn prediction model that reactivated roughly 400 sellers on a base of 6,000 for the Marketplace business, and reduced returns by 67 basis points through a seller incentive redesign.
- Built 32+ dashboards tracking 250+ KPIs across pricing, inventory and margins, and delivered hourly margin forecasts during three consecutive Big Billion Days (Rs. 650 Cr over 5 days), preventing Rs. 5 Cr+ in pricing and discounting errors.
- Recognition: Star Performer four times, promoted once within a three-year stint on the Fashion team.

EARLIER EXPERIENCE

- **Senior Business Analyst, COO's Office, Bounce** (Aug 2019 - Dec 2019): Owned operations and marketing dashboards for weekly leadership reviews; piloted competitive hot-spot vehicle placement that drove a 28% surge in bookings.
- **Associate, Credit Forecasting & Risk Analytics, J.P. Morgan Chase & Co.** (Dec 2019 - Sep 2020): Built forecasting and delinquency dashboards across US Auto and Credit Card portfolios during the COVID payment-holiday programme.

EDUCATION

- **MBA (Marketing)**, Symbiosis International University, 2012 - 2014
- **B.Tech (Information Technology)**, Nirma University, 2008 - 2012
